

Why Neoss is *the partner you need in implant dentistry*

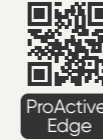

Neoss[®] Digital Workflow

Digital Simplicity for you and your patients

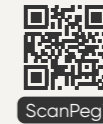

Utilizing a simple digital workflow in your daily practice will save you time, increase predictability, and help you deliver the best functional and esthetic outcomes for your patients.

1. Predictable and simplified implant treatment

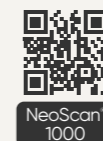

- 1-2 drill protocol
- Reduced steps, saves time
- High primary stability
- Predictable results

2. Simplified healing

- Undisturbed healing
- Less steps, fewer visits
- Digital impression on abutment level
- Single and multi implant restorations

3. Digital impression

- Easy to use
- Fast and accurate scanning
- Open system – implants, prosthetics and orthodontics
- Attractive price and no license fees

4. Prosthetic implant

- Reduce steps, saves time
- Less inventory and maximum flexibility
- Cost-effective solution for small and big clinics
- One prosthetic platform for 70 implants

5. Digital prosthetics

- Centralized design and milling center
- Individualized and standard solutions for patient needs
- Abutment to bridge, milled or 3D printed

6. Predictable long-term esthetics

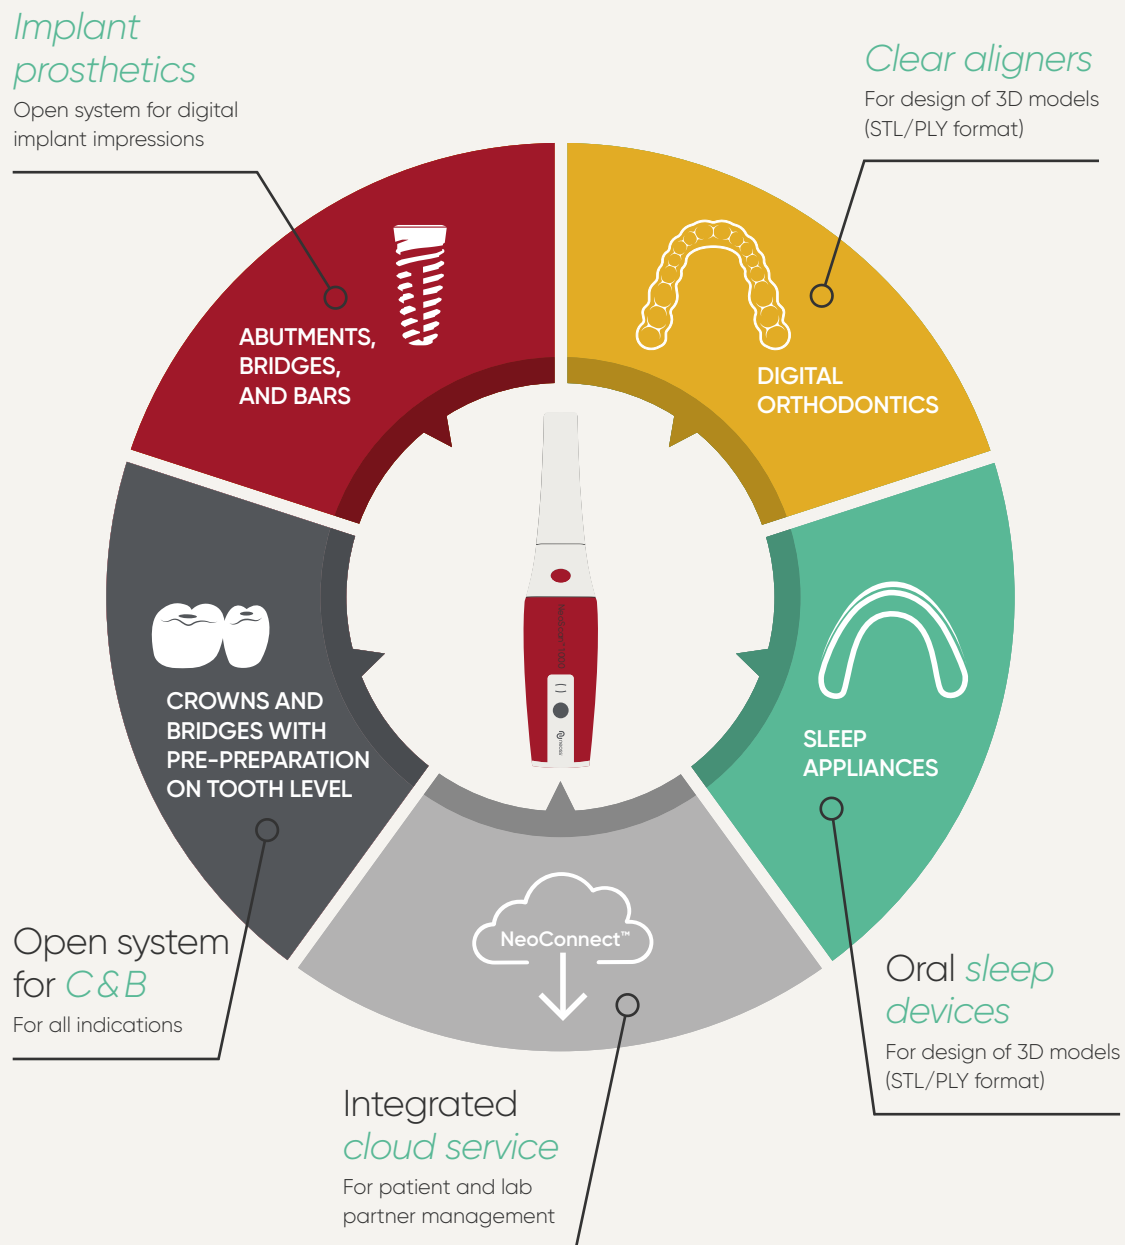

- Stable long-term bone levels
- Excellent esthetics
- Clinical evidence

neossONE™

The only digital impression machine you need!

You can use your NeoScan 1000 for your digital impression needs. It generates common STL and PLY file formats. These formats are industry standards and widely accepted in open systems.
