

Your solution for digital impressions *at the right price!*

NeoScan™ 1000

Intelligent Simplicity

Fast, accurate and *easy to use*

NeoScan™ 1000 is a fast, accurate and easy-to-use intraoral scanner that provides the possibility for a flexible workflow that saves you time and money.

- ✓ Easy to use
- ✓ Fast and accurate scanning
- ✓ Open system – implants, prosthetics and orthodontics
- ✓ Attractive price and no license fees

The simplified USB cable connection gives you the option to share the scanner between dental chairs in your practice. No separate power source is needed.

This easy-to-use scanner is what your practice needs. Best of all, the NeoScan 1000 comes at the right price and no license fees!

Digital dentistry *made easy*

When you purchase the NeoScan 1000, it includes the NeoPro software and NeoConnect cloud service with no additional license or cloud storage fees.

NeoPro™ software

NeoPro makes your digital impressions easy and fast. It's an open system with no software license fees. Amongst other it includes scan history management, smart reminders and free of charge software updates.

- ✓ Optimized scanning of metal/shining surfaces
- ✓ Automatic detection of margin lines
- ✓ Quadrant snapshots for aligner system
- ✓ Occlusal analysis and undercut check

NeoConnect™ cloud service

NeoConnect is designed to improve workflow efficiency. It offers a seamless, efficient and secure process for data transfer and communication with your laboratory.

- ✓ No storage/cloud fees (up to 15 GB clinic, 5 GB lab)
- ✓ Add all the patient data you need
- ✓ Seamless process with your lab partners
- ✓ Full compliance with data privacy

The only digital impression machine you need!

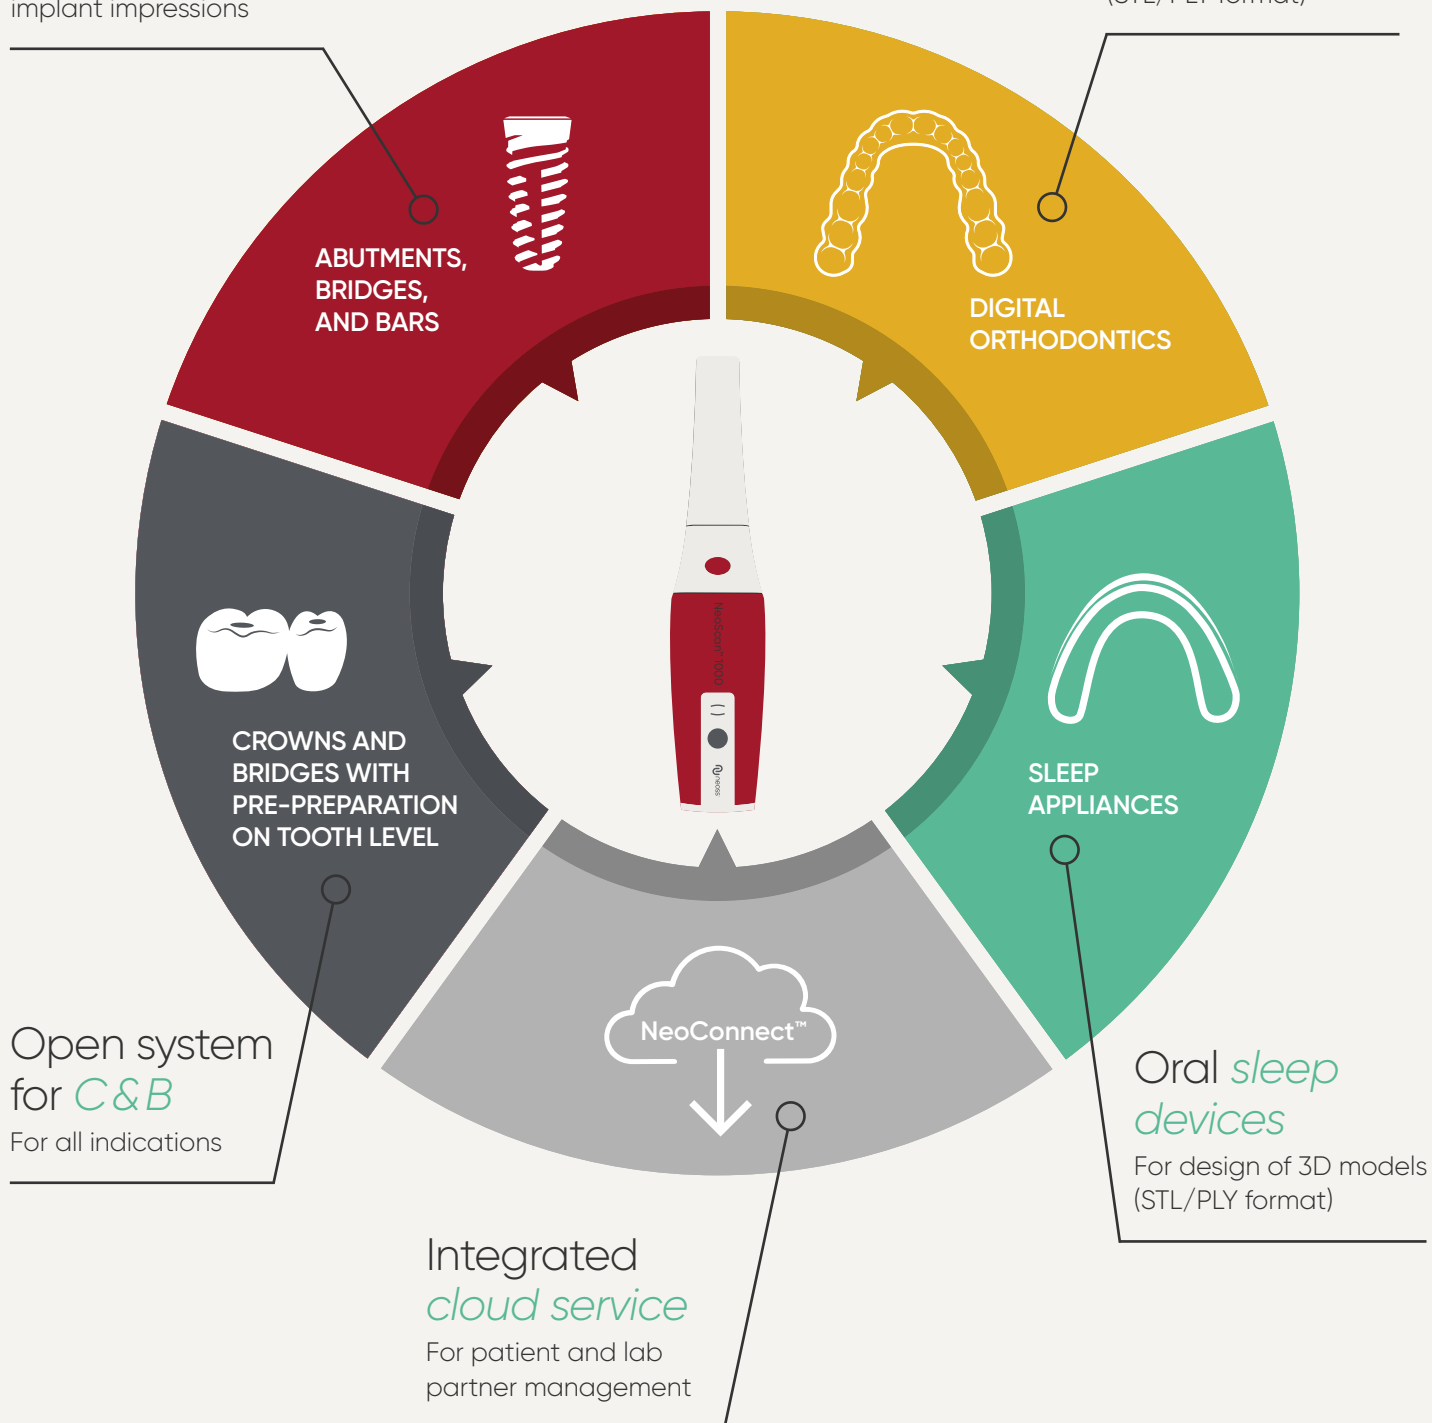

You can use your NeoScan 1000 for your digital impression needs. It generates common STL and PLY file formats. These formats are industry standards and widely accepted in open systems.

Implant prosthetics

Open system for digital implant impressions

Clear aligners

For design of 3D models (STL/PLY format)

Better or equal to industry leading scanners

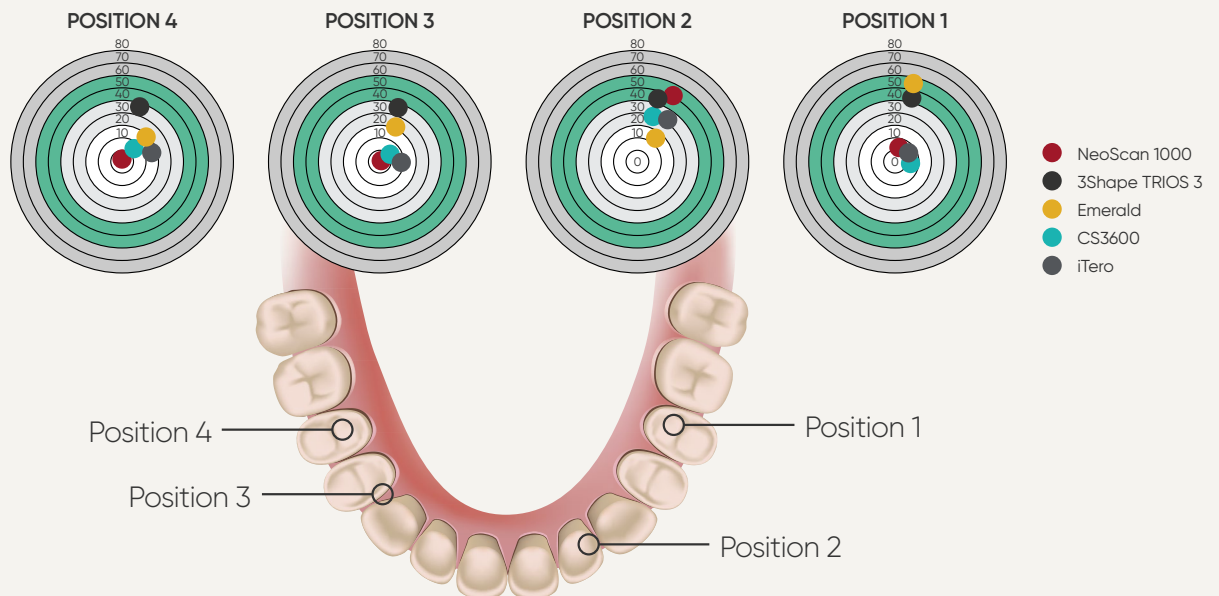

Michael Braian, PHD
Malmö, Sweden

Dr. Michael Braian's bullet chart shows the comparison of inter cylindrical precision on a dentated model. It shows that the NeoScan 1000 is better or equal to industry leading scanners on the market today. Watch his presentation from Neoss Integrate 2022 to learn more.
