

Only with Neoss!

Secure your *vertical bone growth*

NeoGen[®] Cape PTFE Membranes

Intelligent Simplicity

A simple solution for *predictable vertical bone growth*

The new single tooth PTFE implant-secured membrane has its uniqueness in the main anatomical geometry as well as in the way of securing it on to the Neoss implants.

The membranes contours are tailored to minimize the need for manual outer shape adjustment.

- ✓ Fewer treatment steps thanks to direct fixation to the implant
- ✓ Helps you with buccal bone deficiencies in the esthetic zone
- ✓ Flexibility in height with two spacer sizes for controlled bone-regeneration height

NeoGen® Cape Screw

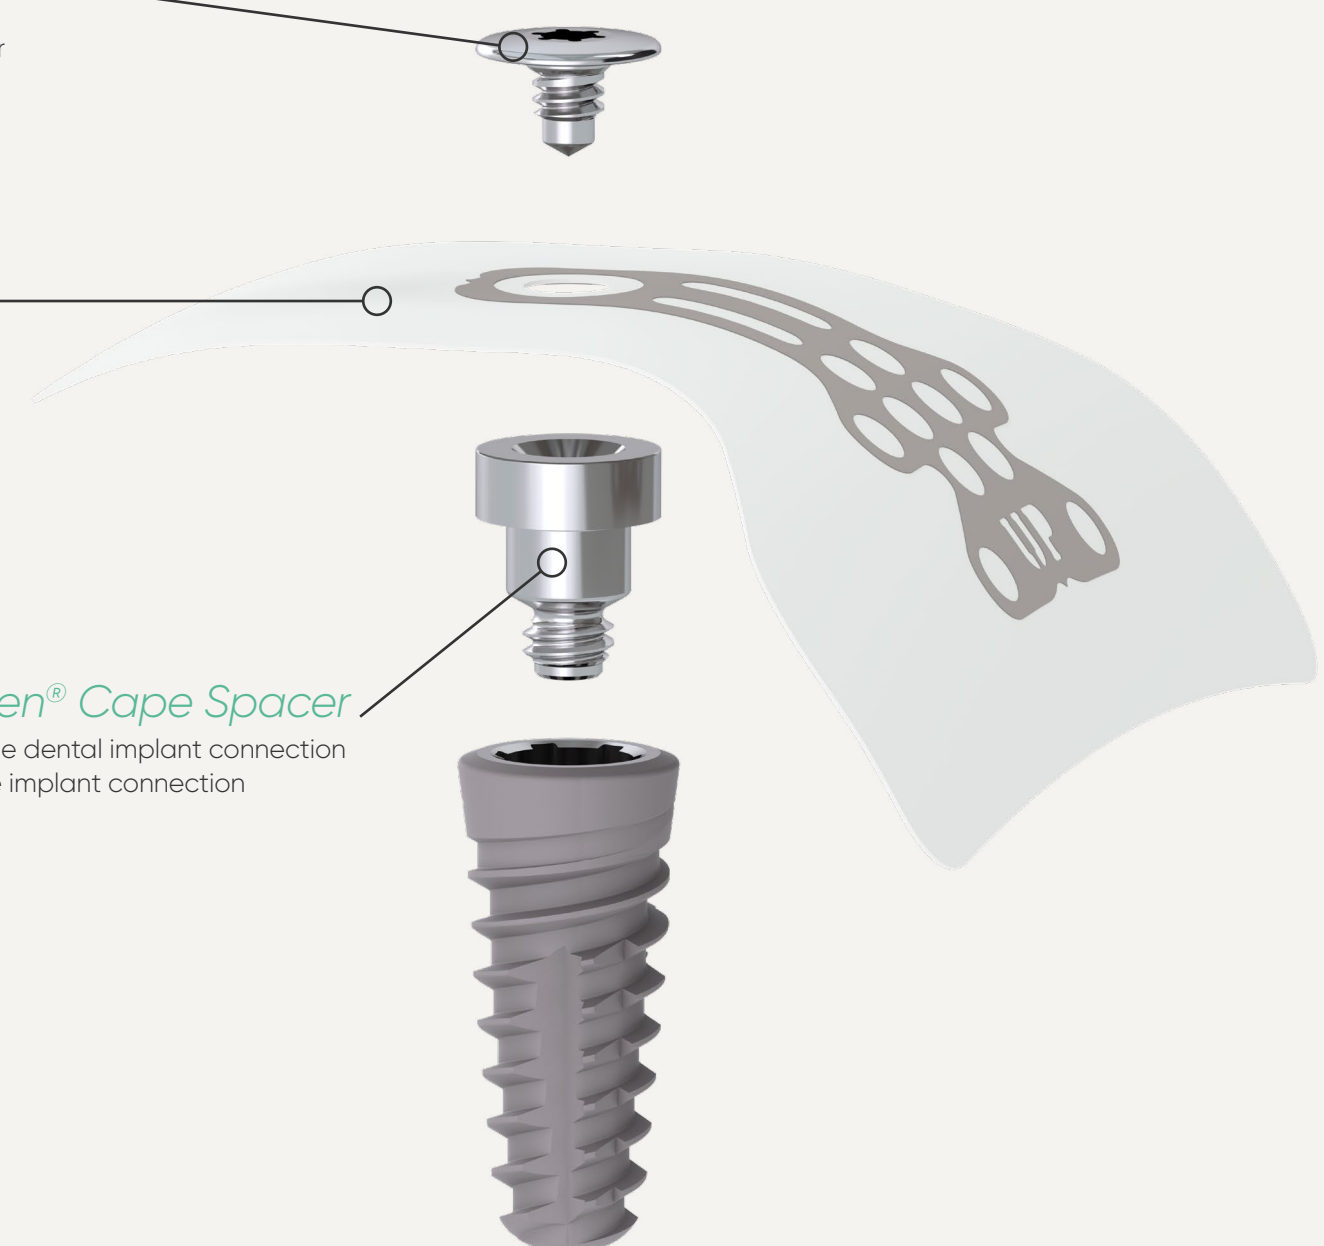

Clamps the membrane on top of the spacer, one type fits all spacer configurations

NeoGen® Cape PTFE Membrane

Titanium reinforced membrane designed with pre-punched hole for implant fixation

NeoGen® Cape Spacer

Fits into the dental implant connection i.e., unique implant connection

Christian Schober, DDS
